- Lead Assessor for the vehicle extrication challenge (SAESI 2017: 33th INTERNATIONAL CONFERENCE, EXHIBITION AND NATIONAL EXTRICATION TRAINING EVENT)

During my time as an Advance Rescue Technician, having to teach and facilitate the preparation of other personnel for this environment, and having been called upon to assist in facilitation and evaluation of various courses to other providers, national and international I discovered that I have a good teaching technique, and that I very much enjoy training and teaching others.

I firmly believe that I can make a positive contribution to the general standard of practice by being involved in the shaping and education of personnel in the out-of-hospital environment.
